

Hussein Hadid

Curriculum Vitae

Profile

I have built a track record in high-profile strategic execution with PwC for world-class clients. By keeping a sharp focus on practical innovation, I run successful projects that break new ground – often against a challenging backdrop.

Work

2013–present Management Consultant at PwC

Awarded the Highly Commended Young Consultant of the Year 2015 prize by the Management Consultancies Association industry body, I have deep experience of leading clients and teams through the entire project lifecycle. Notable work I have performed across planning and scheduling, cost control and risk management, quality management and governance, as well as ongoing reporting and communications:

Client: Tier 1 Investment Bank – Firm Management

- Currently delivering a comprehensive review of the front-office Bank Resource Management division for the Firm's Operating Committee, running senior management interviews with an interdisciplinary client team.
- Managed an organisation-wide Regulatory Affairs project of advanced modelling and documentation to meet the Bank of England's expectations, then coordinating multiple delivery teams to build technology enhancements aligned to global strategic priorities, with a focus on clear benefits realisation.
- Ran a global Legal and Compliance programme responding to an FCA request, developing a suite of policies, handbooks and training to instil a best-in-class market conduct culture.

Client: Healthcare Commissioners – Strategic Planning

- Led a £90m implementation plan for health and social care integration in a challenged health economy, working single-handedly with a partnership of dozens of organisations to develop robust business cases, manage C-suite stakeholders, as well as generate strategic and financial insights – awarded the highest ratings nationally by UK ministers and published by the Department of Health as a best practice example.
- Engaged with senior board members to manage the governance model for responding to a Monitor request, having become a trusted advisor to the Chief Officers following national recognition of my strategic work.

Client: UK Government – Service Design and Implementation

- Developed and executed an operational strategy to roll out George Osborne's flagship pension reforms, personally leading several workstreams to set clear direction for a network of UK-wide delivery partners.
- Acted as a central PMO link of a £300m fund, communicating to an audience spanning over 20 countries and 5 languages, and writing socio-political reports for the Secretary of State.

Business Development and Firm Initiatives

- Wrote and compiled a number of large-scale £1m+ bids, articulating the Firm's competitive advantage, building on my proven ability to scope, contract and on-sell work.
- Published thought pieces with PwC's Marketing department to build the practice's profile, as well as producing the highest-voted idea for PwC's public NHS@75 Digital Competition – subsequently awarded by PwC's Head of People for capturing what makes the firm 'proud to be PwC'.

Education

2017 Genetics and Emerging Technologies Entrepreneurship MA (Cantab.) at University of Cambridge

- Dissertation topic: The role of product-service systems as pharmaceutical business models (written with the Cambridge Judge Business School) – awarded a Very High First (75%) and nominated for the international Undergraduate Awards.

Hussein Hadid

Curriculum Vitae

2010–2013 Natural Sciences BA Hons. (Cantab.) at University of Cambridge

- Course: Biological and Biomedical Sciences | Degree Classification: Class II, Division 1.
- Member of the Clare College Student Investment Fund, responsible for managing £35k+ of the college's endowment – outperforming the FTSE100.

Certifications

2015	Registered PRINCE2 Practitioner	AXELOS
2014	Innovating in Health Care	Harvard University
2009	Enterprise	Oxford, Cambridge and RSA

Other Activities

- Mentoring disadvantaged students under a range of initiatives for almost 10 years, most recently working with the London Nautical School to run one-on-one sessions supporting Higher Education applicants from non-traditional backgrounds to instil a culture of aspiration.
- I am also active in helping start-up founders to shape and refine their ideas and secure funding, with one biotech spin-out named the Life Science Start-up of the Year after guiding the management team with business model recommendations, product and market analysis, and an intellectual property approach.
